"God always geometrizes"

Plato

Pioneer Women

Geometry

Contrasts

The Circle as the ultimate symbol of Divine symmetry and balance.

The Triangle, the symbol of creativity, the uplift and illumination.

Curves and Angles.

White and Black.

The penetrating Greek light and the inner meaning.

The collection Geometry refers to the creative journey of finding the balance between contrary forces, so that symmetry and the Geometrical harmony will be created. Colors inspired by the palette of the Greek landscape, classic patterns from the Geometric period and a touch of modern material come to combine eclectic elements aiming to promote the woman's independent and dynamic nature throughout the ages.

Geometry collection is inspired from the first female Greek mathematicians, that their will for progress was a revolution against the existing status quo.

Before writing his eternal works , the Great Poet Homer, was calling upon the Muse Kalliope , as protector divinity of the Epic Poetry and the Arts , to provide him the inspiration for his difficult task.

On the other hand , the Heroes of his poems were calling upon the winged Goddess Niki (Victory) which is always the target of any fighting person.

Kallos (beauty) and Niki (victory) were two meanings of great importance in the Ancient world and remain as an Inspiration for the modern man today.

The beauty of creativity that will lead to victory of uniqueness and dissimilarity.

The brand “Kalliniki”, inspired by these ideals, designs luxurious hand-made sandals, crafted by highly skilled artisans, using fine quality raw material.
The design lines of the sandals are simple, clean-cut and dynamic at the same time.

Kalliniki is the victory of beauty that resides in every woman.
